Front-End Developer

Landing Page Test

Instructions:

Program a landing page using Bootstrap (http://getbootstrap.com/) based on the design provided. You will have **two hours** to complete as much as possible.

Requirements:

- The landing page should be responsive.
- The form should have field validation for Name and Email.
- The form should send an email to the website owner.
- The form should send a confirmation email to the form filler.
- There should be a thank-you/confirmation page once the form is filled.

You will be graded on:

- Code quality
- Logic
- File organization
- Accuracy of final product vs design proof
- How well the website responds/collapses on smaller devices
